

EC-TYPE EXAMINATION CERTIFICATE

Equipment or Protective System Intended for use in Potentially Explosive Atmospheres Directive 94/9/EC

EC-Type Examination Certificate Number

BAS99ATEX2196

Equipment or Protective System: TYPE XB12 XENON BEACON

5 Manufacturer: MEDC

Address: Pinxton, Nottingham, NG16 6JF

This equipment or protective system and any acceptable variation thereto is specified in the schedule to this certificate and the documents therein referred to.

The Electrical Equipment Certification Service, notified body number 600 in accordance with Article 9 of the Council Directive 94/9/EC of 23 March 1994, certifies that this equipment or protective system has been found to comply with the Essential Health and Safety Requirements relating to the design and construction of equipment and protective systems intended for use in potentially explosive atmospheres given in Annex II to the Directive.

The examination and test results are recorded in confidential Report No

BASEEFA Certification Report 99(CI)0504 dated 10 November 1999

Compliance with the Essential Health and Safety Requirements has been assured by compliance with:

EN 50014: 1997

EN 50018: 1994

except in respect of those requirements listed at item 18 of the Schedule.

- If the sign "X" is placed after the certificate number, it indicates that the equipment or protective system is subject to special conditions for safe use specified in the schedule to this certificate.
- This EC-TYPE EXAMINATION CERTIFICATE relates only to the design and construction of the specified equipment or protective system. If applicable, further requirements of this Directive apply to the manufacture and supply of this equipment or protective system.
- 12 The marking of the equipment or protective system shall include the following:-

EEx d HB T4 ($T_{anab} = -55^{\circ}\text{C to } +55^{\circ}\text{C}$) or T5 ($T_{anab} = -55^{\circ}\text{C to } +40^{\circ}\text{C}$)

This certificate may only be reproduced in its entirety and without any change, schedule included.

File No: EECS 0676/01/274

This certificate is granted subject to the general conditions of the Electrical Equipment Certification Service. It does not necessarily indicate that the apparatus may be used in particular industries or circumstances.

EC-TYPE EXAMINATION CERTIFICATE Nº BAS99ATEX2196

15 Description of Equipment or Protective System

The Type XB12 Xenon Beacon may be rated from 12V d.c. to 240V a.c. with a maximum power dissipation of 50 watts, and comprises a cylindrical enclosure manufactured in glass reinforced polyester with a borosilicate wellgass cemented into the centre of the cover and retained by a circlip. The wellglass may be protected by an optional wire guard arrangement fixed to the cover.

The cover is secured by 6 off M8 x 30mm stainless steel socket head cap screws grade A2-70 or A4-80 with brass thread inserts embedded in the body shell.

The interior of the enclosure comprises a printed circuit board (PCB) incorporating a xenon tube and control electronics, mounted on pillars from the cover. In addition a 6 way terminal block rated up to 41A is mounted to the base of the enclosure.

To obviate the risk of hotspots and capacitor energy storage associated with this unit the cover must not be opened, even when isolated, when a flammable atmosphere is present. Each enclosure is marked with this information.

Up to two cable entry holes are provided in the side wall of the enclosure for the accommodation of suitable BASEEFA certified flameproof cable entry devices, with or without the interposition of a suitable BASEEFA certified flameproof thread adapter. Unused entries are to be fitted with suitable BASEEFA certified flameproof stopping plugs. Suitable flameproof cable entry devices, thread adapters and stopping plugs certified as Equipment (not a Component) under an EC-Type Examination Certificate to Directive 94/9/EC may also be used in the manner indicated above.

The cable entries may be linked by an optional earth continuity plate. Internal earthing facilities are provided along side the internal component connections.

This apparatus is to be installed and used in accordance with the appropriate codes of practice and the manufacturer's instructions.

This certification is to European Directive 94/9/EC only. Functional performance and compliance with other European directives is the responsibility of the equipment manufacturer and/or the user as appropriate.

18 Essential Health and Safety Requirements

	Essential Health and Safety Requirements not covered by Standards listed at (9)				
Clause	Subject	Compliance			
1.0.2	Analysis of possible operating faults	BASEEFA Report No. 99(CI)0504			
1.0.3	Special checking and maintenance conditions	No special requirements			
1.0.6	Instructions	BASEEFA Report No. 99(CI)0504			
1.2.2	Components for incorporation or replacement	Manufacturer's Instructions			
1.2.4	Dust deposits	Certification for gas atmospheres only			
1.2.5	Additional means of protection	Not applicable			
1.2.7	Protection against other hazards	BASEEFA Report No. 99(CI)0504			
1.3.5	Hazards arising from pressure compensation	Not applicable			
1.5	General requirements for safety devices	Not applicable			
1.6.1	Manual override	Not applicable			
1.6.2	Emergency shutdown	Not applicable			
1.6.3	Hazards arising from power failure	Not applicable			
1.6.5	Placing of warning devices as parts of equipment	Not applicable			
2.0	Category M	Not applicable			
2 .1	Category 1	Not applicable			
2.2.1	Category 2G	BASEFA Report No. 99(CI)0504			
2.2.2	Category 2D	Not applicable			
2.3	Category 3	Not applicable			
3.	Requirements for protective systems	Not applicable
